

# POST GRADUATE MEDICAL PROGRAMMES & RESIDENCY TRAINING

## UNIVERSITY OF OTAGO

New Zealand's First University, QS ranked 176<sup>th</sup>.

Ranked in the top 1% of universities worldwide

### POSTGRADUATE MEDICAL (RESIDENCY) TRAINING

(Note: this option does not require enrolment at the University of Otago)

**There are restrictions on the ability of foreign medical graduates to practice Medicine in New Zealand.** Clinical medical practice in New Zealand requires formal registration with the licensing body, which has, like most countries, specific requirements for foreign graduates.

It may be possible to obtain temporary registration for a specific period to undertake supervised practice during residency training. Information on how to obtain temporary registration is available from the Medical Council of New Zealand, PO Box 11 649, Wellington, New Zealand (Website [www.mcnz.org.nz](http://www.mcnz.org.nz)).

Amongst other requirements, there is a major registration examination, the NZREX, which must be passed by foreign medical graduates before they can obtain employment to practice medicine without restriction.

Once you have temporary registration to practice medicine you can seek an approved training post as a House Surgeon or Registrar in a Health Services Hospital. Further information and contacts for hospitals and District Health Boards associated with the University of Otago can be found at <http://micn.otago.ac.nz/courses-and-subjects/residency-training>

### POSTGRADUATE CLINICAL OR NON-CLINICAL STUDY

Please note that postgraduate clinical training is normally carried out in the context of having gained an approved training post in a New Zealand hospital and in association with the appropriate Royal College. While the University offers a number of clinically-based programmes, these are generally preparatory or complementary to the primary training provided in the hospital context. New Zealand medical registration is generally required for clinically-based programmes. Completion of a clinically-based programme does not assist you to gain New Zealand medical registration. The University also offers a number of non-clinical programmes in Medicine which do not require New Zealand medical registration.

Various programmes are offered in each of the Dunedin, Christchurch and Wellington Schools of Medicine. Distance programmes are taught generally within New Zealand only. **International students cannot normally obtain student visas to study distance delivered programmes in New Zealand.**

### POSTGRADUATE STUDY FOR MEDICAL PROFESSIONALS – On Campus, This study only option does not give registration.
